

CHEST POCKET USE

Please note that the chest pocket and belly-cam zips are independent. If you place your phone in the pocket, please ensure that you place it all the way inside the phone pocket shown here. If you just slide it into the first outside zipper, the phone will not be secure.

SLEEPING AND BATHING YOUR SQUIRREL

Don't smother your Squirrel! When it's hibernating, it likes to breathe and relax in a cool, dry, comfortable nest. Do not store your suit for long periods of time in a tightly folded or compressed manner! Doing so will result in the deformation of your inlets. Always fully shade-dry your suit if it becomes wet or damp. Gently rinse with non-chlorinated fresh water to clean, or if ever exposed to salt water. Never use chemical detergents - Squirrels like it all natural, all the time!

Your suit can be hand washed in cold water, or machine washed cold on a gentle cycle. Never tumble dry your suit. Hang dry in the shade.

SAUSAGE TOO

USER MANUAL

CONGRATULATIONS ON YOUR PURCHASE OF A SQUIRREL SAUSAGE TOO ("PRODUCT"). BY PURCHASING THIS PRODUCT, YOU ACKNOWLEDGE THAT ENGAGING IN SKY-DIVING, BASE JUMPING, PARACHUTING, AND "WINGSUITING" IS AN INHERENTLY DANGEROUS ACTIVITY THAT REQUIRES TRAINING, PROFICIENCY, AND SKILL. USE OF THIS PRODUCT MAY RESULT IN SERIOUS INJURY OR DEATH. DO NOT USE THIS PRODUCT WITHOUT INSPECTING IT AND ALL OF ITS COMPONENTS BEFORE EACH AND EVERY USE. YOU ACKNOWLEDGE AND AGREE THAT EVEN WHEN PROPERLY USED, THIS PRODUCT MAY CAUSE SERIOUS BODILY HARM OR EVEN DEATH. YOU, THE PURCHASER, ACKNOWLEDGE AND AGREE THAT THIS PRODUCT IS INTENDED FOR INHERENTLY DANGEROUS RECREATIONAL PURPOSES, AND YOU ASSUME ALL RISK, RESPONSIBILITY, AND LIABILITY WHATSOEVER FROM ANY AND ALL INJURIES (INCLUDING DEATH), LOSSES OR DAMAGES TO PERSONS OR PROPERTY ARISING FROM THE USE OF THIS PRODUCT SOLD BY SQUIRREL, LLC TO YOU, THE PURCHASER. SQUIRREL IS NOT LIABLE FOR ANY SPECIAL, CONSEQUENTIAL, INCIDENTAL, PUNITIVE, OR INDIRECT DAMAGES OR ANTICIPATED PROFITS, HOWEVER CAUSED, IN RELATION TO THE PURCHASE AND USE OF THIS PRODUCT. IN NO EVENT SHALL SQUIRREL'S TOTAL LIABILITY TO YOU, AS PURCHASER, OR YOUR ASSIGNS, HEIRS, REPRESENTATIVES, AND OTHER SIMILARLY SITUATED PERSONS, FOR ALL DAMAGES, LOSSES, AND CAUSES OF ACTION EXCEED THE PURCHASE PRICE PAID BY YOU, THE PURCHASER, FOR THIS PRODUCT. THIS PRODUCT HAS BEEN PURCHASED BY YOU "AS IS" AND WITHOUT WARRANTIES OF ANY KIND, EITHER EXPRESS OR IMPLIED. TO THE FULLEST EXTENT PERMISSIBLE PURSUANT TO APPLICABLE LAW, SQUIRREL, LLC DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OF TITLE AND IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.†

PLEASE READ THIS CAREFULLY BEFORE DOING ANYTHING WITH YOUR NEW SUIT

BEFORE YOU BASE, SKYDIVE!

Every new suit that you fly will require a period of adaptation. Learn to fly your new equipment in the skydive environment, first. Even our most experienced team pilots need skydives to get comfortable in a new design. Please take your responsible progression seriously: skydive your SAUSAGE TOO extensively before you BASE jump it.

The SAUSAGE TOO is designed for experienced trackers. Because the SAUSAGE TOO is capable of pressurized and stable flight at almost any angle, and is agile and maneuverable on its back, belly, and in more vertical configurations, only your imagination will define the limits of what is possible in this suit. Please note that the SAUSAGE TOO is a high volume track suit with more authority and power than a normal two piece suit.

Respect the limits of your abilities and progress slowly. Seek coaching and qualified instruction, and always maintain awareness of your surroundings. It is your responsibility to avoid collisions with other pilots, jumpers, parachutes, all air-traffic, and the planet Earth. Skydiving and BASE jumping are extremely dangerous, and complacency kills.

USE, CARE AND FEEDING OF YOUR SQUIRREL

ZIPPER BUNGEEES

The bungees that hold the zippers tight to the main lift webbing (MLW) of your harness must always be connected. **DO NOT** jump your suit without the zipper bungees set tightly around your harness MLW. Securing the bungees on the inside of the MLW usually results in the zippers being closer, and the hole being smaller.

Keep zippers close against MLW webbing.

Handles completely exposed.
Zippers tight against MLW.

NOTE: If you think that the zipper system is not functioning well with your skydive harness (i.e. your emergency handles are not always 100% accessible), please contact us immediately before your next jump. You may need to modify the zippers so that the sliders stay locked in place, as per the information at this URL: <http://squirrel.ws/zipperstuff>

3D INLET

The 3D inlet is an advanced and effective innovation, however it does require some extra care and maintenance. It is important that you do not abuse your inlets. Do not store your suit in a tightly packed configuration. Do not store your suit folded tightly in hot conditions.

MYLAR

The Mylar at the inlets will become creased and worn over time. Wrinkling and creasing of this material is normal and will not negatively affect your flight. You should, however, take care to minimize the creasing by packing your suit with care.

INNIE-OUTIE ZIP SYSTEM

For BASE mode, you have the option of zipping the front of your harness system inside the suit: place the shoulders of your harness inside the front of the suit as shown. For Skydiving, you **MUST** jump your harness / handles outside the front of your suit. Zip the front of the suit behind your shoulder straps as shown.

BASE

SKYDIVE

INNIE-OUTIE ZIP SYSTEM PART DEUX... CHEST STRAP WIDTH IN BASE MODE

Serious damage to the zipper system can occur if you do not have your chest strap adjusted properly: for example, too loose. This, combined with a hard opening, will over-stress the flexible system. Keep your chest strap properly adjusted, and learn to moderate your openings using proper equipment and technique. If you are BASE jumping, then you should know how to tune your equipment and your flight to have consistently quick but reasonable openings. If you are getting slammed on every deployment, you are doing something wrong. Please feel free to ask us for custom advice on this, if it is needed.

HOOK KNIFE

Every suit comes standard with a Carbon Aero Jack hook knife installed on the front of the suit, in a location that is ideal for jumping your wingsuit with your BASE harness inside the suit, in BASE mode. Check to make sure that the hook knife is loaded properly and that that snap is secured.

When skydiving, please make sure that the hook knife does not interfere with your skydiving reserve handle and remove the knife if necessary. If you have any questions please consult your rigger to ensure proper operation of your emergency handles.
